

CADAVER LAB HPB OPEN

AIMS Milano
12 September 2025

PRACTICAL COURSE IN
HEPATOBILOPANCREATIC
SURGERY ON CADAVERS

COURSE DIRECTOR:
PROF. RICCARDO MEMEO

The course will be conducted in English

Course Description

Hepatobiliopancreatic surgery, increasingly oriented towards the minimally invasive approach, requires solid preparation in open surgery.

The aim of the course is to complete a whole series of complex surgical procedures, starting from the basic principles up to the most advanced surgical techniques applied to the liver, pancreas and biliary tract. The possibility of training on real anatomical models represents a unique practical training tool for the learner.

Each student, under the supervision of an expert tutor in HPB surgery, will be guided and advised on the best way to perform the procedures, discussing and resolving all doubts related to the surgical gesture and its application.

Program

Liver surgery

Pringle maneuver

Intraoperative ultrasound

Mobilization of the right liver

Isolation of the hepatic veins

Caval control
